Students who could be scheduled by an ARD committee to be on the main campus at any time during the school day may be reported on the main campus calendar. Standalone programs that do not follow the main campus calendar and have not been allotted a modified operational minutes requirement by the TEC, §48.005(i)-(j), as outlined in the chart above, are expected to meet the 75,600 operational minute requirement. Any calendar that does not meet minimum minute requirements is subject to audit and may experience a proportional funding adjustment.</p>

For a district or campus with multiple tracks, the overall average attendance rate for all tracks must be used. For a new campus or a campus that existed as two separate campuses the prior year, the overall average attendance rate for the district as a whole must be used. <p>These documents should be uploaded as attachments in the automated waiver application system.</p> <p>Note: An instructional day that experiences low attendance but does not meet the qualifications for the waiver must still report that date as a day of instruction and should not be changed to a non-instructional day, even if the LEA has excess minutes in the calendar. LEAs are responsible for submitting current, complete, and accurate data required for each PEIMS and TSDS collection. Each person entering data into the attendance accounting system must attest that the data he or she has entered are true and correct to the best of his or her knowledge. The superintendent must affirm that he or she has taken measures to verify the accuracy and authenticity of the attendance data. See 3.1 Responsibility.</p>
Revision	<p>3.8.1.4 Staff Development Waivers</p> <p>Note: Effective with the 2025–2026 school year, districts and open-enrollment charter schools that are four-day-school-week LEAs are not eligible to receive a staff development waiver.</p> <p>Staff development waiver minutes are for staff development in place of student instruction. Therefore, the waiver minutes are only applicable to staff development provided instead of student instruction during the school year. The total waiver minutes for staff development may not exceed 2,100 minutes per school year. For charter schools operating before January 1, 2015, staff development waivers may not exceed five days per school year.</p> <p>Staff development waiver minutes/days may not be used prior to the first day of student instruction or after the last day of student instruction. On staff development days when students are in attendance part of the day, the district or open-enrollment charter school must provide at least 120 minutes of student instruction to receive full ADA funding. In addition to the 120 minutes of student instruction, any staff development waiver minutes reported must reflect actual staff development minutes provided.</p> <p>Note: Districts or charter schools must demonstrate that they are providing high quality staff development that will impact student outcomes. Staff development on staff development waiver days may be specific to the needs of individual campuses/workgroups and may be delivered at different physical locations. However, the professional development must be synchronous and scheduled to take place at the same time and for the same length of time for all staff employed at the same campus on the day(s) the district is claiming staff development waiver minutes for that campus. Staff development not utilized as part of the waiver may still take place. However,</p>

If your district determines that an evaluation is not necessary, the timeline to develop, adopt, and implement a new IEP is 20 school days from the date the student is verified as being a student eligible for special education services. Verification means the new district has received a copy of the student’s IEP that was in effect in the previous district. 3. Your district must take reasonable steps to promptly obtain the student’s records from the previous district. If a parent hasn’t already provided verification of eligibility and your district has been unable to obtain the necessary verification records from the previous district by the 15th working day after the date a request for the records was submitted by your district to the previous district, your district must seek verification from the student’s parent. If the parent provides verification, your district must comply as described in (1) and (2) above. Revision	<p><i>4.7.3 Code 02 – Hospital Class</i></p> <p>This instructional setting code is for providing special education services by school district personnel at a hospital or other medical facility, or at a residential care and treatment facility not operated by your school district. If a student residing in the facility is provided special education and related services at a school campus but the student’s parent is not a district resident, the student is considered to be in the residential care and treatment facility instructional setting code described below. If a student residing in the facility is provided special education and related services at a school campus and the student’s parent, including a surrogate parent, is a district resident, the student’s instructional arrangement is reported based on the services that are provided at the campus on the same basis as a resident student residing with his or her parents.</p>
Revision	<p><i>4.7.4 Code 08 – Vocational Adjustment Class (VAC)</i></p> <p>Although referred to as a class, this instructional setting code is a support program for providing special education and related services to a student who is placed on a job (paid or unpaid unless otherwise prohibited by law) with regularly scheduled, direct involvement by special education personnel in the implementation of the student’s IEP. This setting code will be used in conjunction with the student’s transition plan, as documented in the student’s IEP, and may include special education services received in CTE work-based learning programs. This may include special education services received within CTE classes, such as Career Preparation, or in work-based learning for local credit, as specified by the ARD committee and documented in the IEP. Periodic consultation with employers in a work-based learning program does not constitute eligibility for this instructional setting code.</p> <p>For a VAC example, see 4.18.3 Code 08 – Vocational Adjustment Class (VAC) Example.</p>

	<p>There are a few cases where changing the type of record used during a reporting period is allowed, such as when a student enrolls in OFSDP for the first time or transitions in or out of a DAEP placement. Another would be for an OFSDP student to begin receiving PRS CEHI services in the middle of a six-week reporting period. The student’s attendance is reported with a BasicReportingPeriodAttendance Entity (according to the CEHI funding chart in 9.10 Confinement and Earning Eligible Days Present) and an ADA eligibility code of 1 at the time the student began receiving CEHI services, even if that date occurred within the six-week reporting period. Once the student stopped receiving CEHI services and returned to school to participate in the OFSDP, the student’s attendance is reported with a FlexibleRegularProgramReportingPeriodAttendance Entity and an ADA eligibility code of 7, even if the transition occurred in the middle of a six-week reporting period.</p>

Deletion	<p>12.3 Remote Instruction That Is Not Delivered through the TXVSN</p> <p>For the purposes of this subsection, remote instruction means instruction provided through a technology that allows for real-time, two-way interaction between a student and teacher who are in different physical locations. Examples of such technology might be interactive video conferencing, live audio/video streaming, or a robot that allows for virtual interaction between student and teacher. The technology must allow for both real-time, two-way audio and real-time, two-way video interaction. The instruction cannot be concurrent, which means remote students must not be taught by a teacher who is also teaching in-person students at the same time.</p>

Deletion	<p>[12.6 Virtual Instruction (Local Remote Learning Programs under the TEC, §29.9091, or as Modified by the TEC, §48.007(c))</p> <p><i>12.6.1 Methods of Virtual Instruction</i></p> <p>Virtual instruction may take one of the following three forms:</p> <p>The first form is remote synchronous instruction. The method of instruction involves two-way, real-time/live, virtual instruction between teachers and students when students are not on campus. In this method, the required amount of instructional time is scheduled each day, and funding is generated when attendance is recorded daily at a locally selected snapshot time. Synchronous instruction is provided through a computer or other electronic device or over the phone.</p> <p>The second form is remote asynchronous instruction. This method of instruction involves instruction that does not require having the instructor and student engaged at the same time. In this method, students learn from instruction that is not necessarily being delivered in-person or in real time. This type of instruction may include various forms of digital and online learning, such as prerecorded video lessons or game-based learning tasks that students complete on their own, and pre-assigned work and formative assessments made available to students.</p> <p>The third form is a combination of both synchronous and asynchronous instruction.</p> <p>A board-approved local policy will determine the instruction methods (i.e., synchronous, asynchronous, or a combination of both). The local policy should include the official attendance times for synchronous instruction. Additionally, if the board policy indicates approval for asynchronous method, the LEA must create an asynchronous instructional plan (described more fully below) and it must be publicly posted on the LEA's website.</p> <p>No matter which of these methods of instruction is used, all instruction must address the required curriculum per the TEC, §28.002, and meet the needs of students in special population/intervention groups.</p>

	<p>For both synchronous and asynchronous instruction, there are two requirements:</p> <ul style="list-style-type: none"> ● Daily attendance must be taken. Each school day, LEAs will identify students who are participating in the local remote virtual option as Remote Synchronous (RS) Eligible Days Present or Remote Asynchronous (RA) Eligible Days Present, depending on the student's instructional method. Days Present will need to be identified as days present in the RS method or days present in the RA method. Absences will not need to be distinguished between instructional methods. ● The minimum 240 instructional minutes requirement must be met. Both synchronous and asynchronous instruction require that at least 240 instructional minutes are offered to each student each school day in order for the student to earn a full day of funding. At least 120 instructional minutes are offered to earn a half day of funding. Students enrolled in pre-K are not eligible for ADA if served via remote instruction. <p><u>12.6.3.1 Remote Synchronous Instruction</u></p> <p><u>Requirement 1: Attendance Taking</u> In a remote synchronous teaching and learning method, students who are logged in at the teacher's documented official attendance time are marked present for that day. Students who are not logged in at the teacher's documented official attendance time are marked absent.</p> <p>For remote synchronous instruction, teachers will take and post attendance as if the student was physically present in the on-campus classroom daily. The student's camera must be turned on, and the teacher must see the student in order to mark the student present. Just as with traditional on-campus attendance, official attendance will be taken at a certain time determined by the LEA's policy. If the teacher cannot confirm that the student is physically present at the attendance taking time, the student will be marked absent under this option and generate zero funding for the day. A student who is found later to have participated synchronously or asynchronously but was not present during the official attendance taking time is still absent for funding purposes of synchronous attendance for that day.</p> <p><u>Requirement 2: Minimum 240 Instructional Minutes</u> A program meets the remote synchronous method requirements for full-day funding if the daily instructional minute minimum of 240 minutes is provided through the synchronous instruction method, even if part of the day includes additional time for asynchronous activities. However, attendance must be taken during synchronous instruction at the official attendance time. The daily instructional minutes need not be consecutive. LEAs should maintain documentation of remote synchronous instruction provided to students through instructional schedules that show the number of minutes each day students are expected to engage in remote synchronous instruction.</p> <p>Time students spend participating in work-based learning opportunities can continue to be included in the daily instructional minute calculation and can be considered a synchronous instruction method. Work-based learning opportunities include internships, externships, apprenticeships, and mentorships.</p>

	<p>This method also allows students who are taking CTE courses to continue teacher-led instruction and generate CTE funding. Special education students who are coded mainstream can receive their regular instruction and special education services through this remote synchronous instruction method as well, unless their IEPs reflect that the services must be provided on campus.</p> <p>12.6.3.2 Remote Asynchronous Instruction</p> <p>This method allows LEAs the flexibility to earn daily attendance through primarily asynchronous instructional methods OR through a combination of asynchronous and synchronous instruction. LEAs should use this method to track attendance if students are not receiving the minimum number of synchronous instructional minutes required by the synchronous instruction method. In the asynchronous instruction method, the LEA ensures students have access to the required number of daily instructional minutes by planning for and keeping documentation of the daily attendance measure, instructional schedule and materials, progress monitoring, and teacher supports the students receive in order to earn daily attendance.</p> <p><u>Requirement 1: Attendance Taking</u></p> <p>Measurement frequency is daily and may occur from 12:00 am to 11:59 pm every day the campus is open or in a narrower daily time window as determined by the local plan. Daily measurement options for attendance include the following:</p> <ul style="list-style-type: none"> ● daily progress in the learning management system (LMS) that confirms students accessed instruction, as defined by the LEA ● daily check in via teacher-student interactions that confirms students accessed instruction, as defined by the LEA ● completion/turn-in of assignments from student to teacher (potentially via email or online) <p>LEAs must maintain documentation to support the daily attendance a student has earned.</p> <p>The locally defined student attendance measure will establish daily attendance. A student will be considered absent if the student does not have documented engagement with the LMS and/or daily contact with the teacher and/or documentation of completion/turn-in of daily assignments within the school day as defined in the local plan if it is a narrower window than the 24-hour day. A teacher or campus representative will input the student's daily attendance into the Student Information System (SIS) for the asynchronous method for any day attendance occurred based on one of the above three methods by marking the student Remote Asynchronous Eligible Days Present. There is no requirement that remote asynchronous attendance must be posted in the SIS on the same day the engagement occurs. LEAs are free to develop policies and procedures that work best on their campuses.</p> <p>Note: A learning management system is any electronic system used for virtual instruction that provides data that can be used to document individual student engagement as defined in this section.</p>

The number of instructional minutes students have access to must match or exceed 240 instructional minutes of daily minimums across all subjects for kindergarten through 12th grade. LEAs must maintain documentation of the plan for asynchronous instruction which demonstrates students have access to the minimum required number of daily instructional minutes.</p> <p><u>Requirement 3: Publicly Posted Asynchronous Plan</u> The LEA must develop an asynchronous instructional plan as documentation for meeting the minimum instructional minutes and attendance requirements.
