Grade 5 – Science

Appendix

1.1

A student heats 250 milliliters of water in a cup to approximately 50 °C and adds 6 grams of salt. The mixture of salt and water is then stirred for 15 seconds.

Which results will the student **MOST LIKELY** observe after the mixture has been stirred for 15 seconds?

Select **TWO** correct answers.

The salt will dissolve.

The salt will sink to the bottom of the cup.

The water will remain clear.

The salt will float on the water.

The water will change from clear to opaque white.

1.2

A student makes a list to describe a friend. Which of the listed characteristics is a learned behavior?

Select **TWO** correct answers.

Brown eyes

Draws well

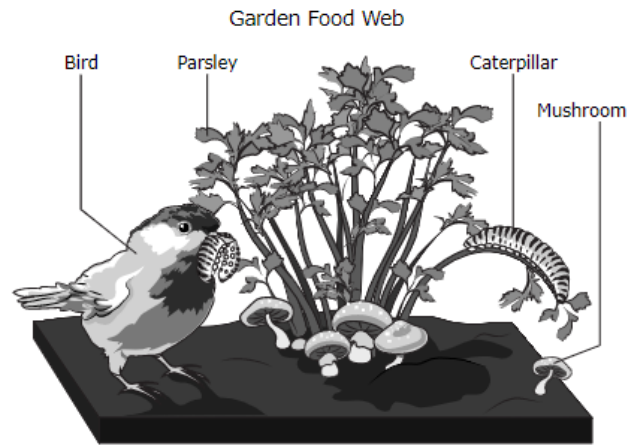

Has freckles

Reads daily

Blonde hair

1.3

Students create a drawing of organisms in a garden. In their drawing, a bird eats a caterpillar. Another caterpillar is eating the leaves on a parsley plant. Mushrooms grow in the shadow of the parsley.

Complete the table to show the role each organism has in the food web, based on the students' drawing.

Move the correct answer to each box. Each answer may be used more than once.

Producer Consumer Decomposer

Organism	Role in the Food Web
Bird	Consumer
Mushroom	Decomposer
Caterpillar	Consumer
Parsley	Producer

1.4

A class is using the setup shown to test this hypothesis.

The shorter the stack of books becomes, the shorter the distance the toy truck will roll.

What is **ONE** more piece of equipment needed to test the hypothesis **AND** how can the hypothesis be tested?

Look at the diagram carefully. Then enter your answer and explanation in the box provided.

The student needs to identify at least one more piece of equipment such as a ruler, measuring tape, or meter stick **AND** include at least one idea for how the hypothesis can be tested: varying the size of the book stack, measuring distance traveled, repeated trials.

1.5

Rank the different soil types based on their ability to retain water.

Move the correct answer to each box.

Gravel Sand Silt Clay Loam

**Soil Water
Retention
Rank**

Most ↑ Least	Clay
	Loam
	Silt
	Sand
	Gravel
